Vol. No. 1

NFPA 110 changes for 2022 and what that may mean for you

The National Fire Protection Agency has released their new [2022 NFPA 110](#) Standard for Emergency and Standby Power Systems. While hospitals, Assisted Living Centers and Nursing Homes fall under other governmental authorities, such as DADS and JCAHO, they are also obligated to follow the requirements as set forth in NFPA 110. Though not required, some city and county municipalities adopt the requirements of NFPA 110 for anything they may deem to be life safety. So, it's important for any facility that falls under these requirements, and more importantly, the engineers who are responsible for the upkeep and maintenance of their backup power systems, to know and understand NFPA 110 requirements. The 2022 revised edition has some minor changes from the previous edition. Questions? Email us at info@powersmith.net to get your free consultation and learn more.

Powersmith values its customers and shows appreciation by giving back! Scan the QR code to learn how.

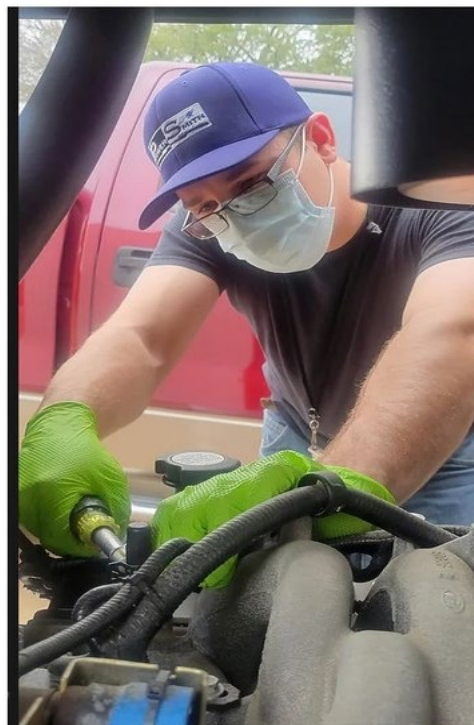

We can assist with navigating and complying with NFPA 110 codes. Call or email us for a consultation to see how we can help you. info@powersmith.net
